

hermetech or hermetechs n.: The science of orgasmic energy potential, esp. within fixed unit (within time, space), adj. of or relating to properties of orgasmic energy [C20, Gk L of Hermes traditionally inventor of magic seal] Tech-Green, an environmental movement with quasi-political powers, is doing its best to repair the damaged circuitry of the global village. The earth is dying and there is little that anyone can do to stop it - some sections of Tech-Green assert that Gaia would be best left to repair herself without the interference of humanity, that man should move off-world to Sky City One. At Talers Bump, a small Naturotech religious site, Ari Famber communes with Isis, a satellite acolyte of the goddess Astrada. But there is little Isis can do about Ari's problems. The daughter of one time Tech-Green wunderkind, Ewan Famber, Ari is the product of a ground-breaking experiment that has left her genetically and sexually confused. Ewan has no answers; he is dead. But in Arcady Tkmmuz Malamute lives on - with memories of creations he'd rather forget... Seven years ago, Leila Saatchi, leader of Star Eye, promised Ewan that she would find his daughter when the time was right; protect Ari from those who might misunderstand and misuse her. But the natro group are about to take on something neither they nor the Tech-Greens would have ever imagined possible... HERMETECH is a stunning vision of Earth's near-future, a dramatic prediction of the mingling of science and mysticism, from the creator of the Wraeththu.
